# Accessibility

These checks highlight opportunities to improve the accessibility of your web app. Only a subset of accessibility issues can be automatically detected so manual testing is also encouraged.

**Contrast** — These are opportunities to improve the legibility of your content.

⚠ Background and foreground colors do not have a sufficient contrast ratio.  ⌄

**ARIA** — These are opportunities to improve the usage of ARIA in your application which may enhance the experience for users of assistive technology, like a screen reader.

⚠ ARIA IDs are not unique  ⌄

**Internationalization and localization** — These are opportunities to improve the interpretation of your content by users in different locales.

⚠ `<html>` element does not have a `[lang]` attribute  ⌄

**Names and labels** — These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

⚠ Form elements do not have associated labels  ⌄

**Additional items to manually check (10)** — These items address areas which an automated testing tool cannot cover. Learn more in our guide on conducting an accessibility review.  ⌄

**Passed audits (11)**  ⌄

**Not applicable (26)**  ⌄
