

Accessibility

These checks highlight opportunities to improve the accessibility of your web app. Only a subset of accessibility issues can be automatically detected so manual testing is also encouraged.

Names and labels — These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

▲ Buttons do not have an accessible name	~
Contrast — These are opportunities to improve the legibility of your content.	
▲ Background and foreground colors do not have a sufficient contrast ratio.	~
Internationalization and localization — These are opportunities to improve the interpretation of your content by users in different locales.	
▲ <html> element does not have a [lang] attribute</html>	~
Tables and lists — These are opportunities to improve the experience of reading tabular or list data using assistive technology, like a screen reader.	
▲ Lists do not contain only <1i> elements and script supporting elements (<script> and <template>).</td><td>~</td></tr><tr><td>Additional items to manually check (10) — These items address areas which an automated testing tool cannot cover. Learn more in our guide on conducting an accessibility review.</td><td>~</td></tr><tr><td>Passed audits (13)</td><td>~</td></tr><tr><td>Not applicable (24)</td><td>~</td></tr></tbody></table></script>
