

## Accessibility

These checks highlight opportunities to [improve the accessibility of your web app](#). Only a subset of accessibility issues can be automatically detected so manual testing is also encouraged.

**Names and labels** — These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

- ▲ Buttons do not have an accessible name ▼
- ▲ Links do not have a discernible name ▼

**Contrast** — These are opportunities to improve the legibility of your content.

- ▲ Background and foreground colors do not have a sufficient contrast ratio. ▼

**Internationalization and localization** — These are opportunities to improve the interpretation of your content by users in different locales.

- ▲ `<html>` element does not have a `[lang]` attribute ▼

**Tables and lists** — These are opportunities to improve the experience of reading tabular or list data using assistive technology, like a screen reader.

- ▲ Lists do not contain only `<li>` elements and script supporting elements (`<script>` and `<template>`). ▼

**Additional items to manually check (10)** — These items address areas which an automated testing tool cannot cover. Learn more in our guide on [conducting an accessibility review](#). ▼

**Passed audits (12)** ▼

**Not applicable (24)** ▼
